

I had heard that our FM 88.9 station could be replaced by LPFM. This station has been such a blessing to our community by providing positive, encouraging music that is much needed in these perilous times. Our community needs to have a family focused, positive, uplifting station to provide comfort to the weary, hope to the downtrodden, love to the hurting and encouragement to those in need. I believe that the service provided by our K-LOVE (88.9 FM) station is our community's life line to everyone who has a need. By replacing our station with a LPFM station can and will crush the wholesome values that are needed in communities all across our nation. People in every community need a station that provides the values/principals that K-LOVE encourages to preserve our American heritage.
